Subject: Wolverine PFAS results
Attachments: Wolverine Water Sampling Summary 20180115.xlsx

Hello Jennifer,

My name is Brent Ritchie and I am a START contractor working with Jeff Kimble on the Wolverine site in Rockford, MI. Jeff mentioned you as a contact for obtaining results from Wolverine's contractor for residential well sampling. We are starting to get preliminary data in and are looking to compare that to the previous results obtained by Wolverine. I've attached a table which summarizes the samples we collected during the most recent sampling event. There are 16 properties where we collected residential water samples Ex. 6 - Personal Privacy and address and parcel ID information is included in this table. I am looking for PFAS analytical results from these homes. I was able to find results from a Wolverine table for the 4 sample locations not highlighted in the table. However, all that was in that table was the combined PFOA and PFOS results, if you have lab data or further results broken down into more PFAS analytes for those 4 samples as well that would be helpful. I currently have no results from Wolverine for any of the highlighted residences.

Any help you could provide would be greatly appreciated.

Brent Ritchie, MS
